4. c. 29 September 1247 to c. 29 September 1248

Although a Pipe Roll survives for the bishop of Winchester's estate for the year 1246/7, no account for the manor of Esher was entered onto it. However, an entry in the account for Farnham for that year suggests that significant developments were taking place at Esher, as 40s. was transferred to Gilbert de Sandon 'for the expenses of the house of Esher'.³⁵ The implication that building work was being carried out at the manorial centre is supported and amplified by the long, idiosyncratic, and highly informative account for Esher that survives for 1247/8. Gilbert de Sandon, who we are told was a chaplain at Sandon Priory,³⁶ again received money for 'work on the buildings of the lord of Winchester ... at Esher', and was presumably acting in a supervisory capacity. Meanwhile, details in the account indicate a massive expansion of the manorial centre: work was done on administrative buildings, including a hall, a solar, a treasury, a wardrobe; on a residential 'small chamber'; on service

³⁴ This rare example of the taking of tallage, a manorial exaction at the will of the lord, perhaps relates to the fire and the charge of concealment.

³⁵ HRO, 11M59/B1/20.

³⁶ He was probably the prior or master, who Meekings refers to as 'Giles': Meekings, 'Early history of Sandon Hospital'. In the Winchester Pipe Rolls he is called 'Gilebertus'.

buildings, including a kitchen, a buttery, and a pantry; and, outside, on a stable; lastly, 'a great ditch', probably a moat, was dug around the *curia*. Nor was expansion restricted to the manorial centre, for the amount of arable land that was sown in 1247/8 greatly exceeded that sown two years earlier: 31 quarters of corn had been sown in 1245/6 over an estimated 74 acres, but this now rose to 75 quarters 1 bushel of seed, over approximately 186 acres of land; in fact, this was the high-water mark of arable cultivation at Esher by the bishop. This expansion in cropping is partly explained by the acquisition of Northwode, an area of land in the neighbouring settlement of Cobham, that the bishop held from Chertsey Abbey. The account also provides an unusual wealth of information about the local economy, not least regarding the use of markets and local suppliers, the recoinage of 1247–50, and a rare enumeration of tithe returns for corn.³⁷

Corn

The same render account for £10 13s 4d from corn sold in its entirety at Northwode.³⁸ And for 16½d from ½ quarter of wheat sold at Esher that was not clean. And for

³⁷ The only other account in which tithe corn was recorded for Esher is that for 1335/6 (doc. 29). Tithe corn was perhaps recorded in this way when a vacancy in the benefice extended over the harvest period.

³⁸ This suggests that Northwode was acquired by the bishop with corn still standing in its fields, and that this corn was subsequently sold wholesale, to be cut by the buyer.

13s 10d from 6 quarters 2 bushels of 'drauk' sold,³⁹ of which $\frac{1}{2}$ quarter was sold for 16 $\frac{1}{2}$ d and afterwards 1 quarter for 2s 7d, a second quarter for 28d, a third quarter for 26d, a fourth quarter for 2s $\frac{1}{2}$ d, a fifth quarter for 23d, and 6 bushels for 16 $\frac{1}{2}$ d.

In soap and grease for the cart and ploughs this year 11 $\frac{1}{2}$ d. In repairing two ploughs, with equipment, and one harrow during the year 8 $\frac{1}{2}$ d. In buying one trivet 9d. In one pair of wheels bought for the cart 15d. In one pair of wheels bought for the plough 5d. In

³⁹ In MS, 'droua'. 'Drauk' or 'drawk' is a Middle English term for various weeds; this sale probably represents grain mixed with weeds. Later, we are informed that this came from peasant land.

⁴⁰ The breakdown of sales adds up to 30 $\frac{1}{2}$ quarters rather than 50 $\frac{1}{2}$ quarters.

⁴¹ As in MS: 'lxs viijs iiijd'.

⁴² It is not clear to what this sum relates, but it is plausibly income from the previous year which, because of the lack of an account for 1246/7, had not yet been accounted for.

Rye

The same render account for 29½ quarters of rye from the demesne. And for 3 quarters 7 bushels from increment of the same. And for 29 quarters of rye from tithe.

⁵¹ That is, up to the sockets into which the roof timbers fitted.

⁵² This does not tally: the amount of money spent and the rate suggest that 248, not 28, perches of ditch were dug.

⁵³ It was not uncommon for grain to be heaped in bushel measures by threshers. However, when assessing the total amount of grain produced after this task had been completed, it was good practice for reeves to use a level measure. The difference between the heaped measure and the level measure, in terms of additional grain, was then accounted for by the reeve as an 'increment'. For advice to lords on checking that reeves were not deceiving them in this practice, see Oschinsky, ed., *Walter of Henley*, pp. 324–5.

⁵⁴ In MS, 'de consili'.

And for 3 quarters 5 bushels from increment of the same. And for 7 [quarters] 3 bushels of rye bought. Sum 73 quarters 3 bushels. Of which in seed for 55 acres 13 quarters.
