28. 23 September 1334 to 29 September 1335⁴⁵⁰

In April 1331, Bishop John de Stratford had been granted permission to enclose 'a certain way' in Esher so that the bishop's manorial centre could be enlarged.⁴⁵¹ It is

⁴⁴⁹ Assuming the clerk meant the feast of the Birth of St John the Baptist.

⁴⁵⁰ Despite resistance from Edward III, Adam de Orleton was translated to the bishopric of Winchester on 1 December 1333; because of the king's displeasure, he only received the temporalities on 23 September 1334. The Winchester Pipe Roll for 1334/5, therefore, contains both a short account for the last seven days of the accounting year to Michaelmas 1334 as well as an account for the whole of the following year.

⁴⁵¹ TNA, C143/218/6. The king ordered an enquiry into this matter on 19 March 1331; permission was granted on 4 April 1331.

possible that major building work was carried out at the manor in 1332/3 but is hidden from view: as in 1246/7, when the manor was first developed by the bishopric (see above, doc. 4), no Esher account was entered on the Pipe Roll for that year. However, following the appointment of de Stratford as archbishop of Canterbury in November 1333 and the installation of his successor as bishop of Winchester, Adam de Orleton, some significant building projects are documented. In particular, a new tiled stable was built in 1334/5, using (among other things) timber from Chertsey Abbey and Newark Priory, planks collected from Farnham, and lime bought at Kingston. Many other buildings were mended, the list of which provides a useful gauge of the extent and complexity of the manorial centre at this time, both above and – judging by the reference to ‘two chambers beneath the gate’ – below ground. We are also given further information about the interior appearance of some of these chambers, for a platform and two benches were made for the lord’s chamber, three benches were made for the chapel, a trestle table was received from ‘Lord Robert Daubernon’, doors were decorated with a range of ironwork, and two ‘puleyns’ were installed, presumably for lowering casks down to the storeroom. The landscape surrounding the manorial centre was also altered following the closure and diversion of the road. Perhaps most conspicuously, with the exception of an ornamental fragment of vineyard that was retained, the era of viticulture at Esher was definitively brought to a close. A meagre quantity of grapes had been harvested in the preceding 20 years and the bulk of the vineyard was now ploughed up, to be sown with 6½ acres of wheat and 1½ acres of rye. The account contains many other incidental details, not least concerning some of the people who helped to produce it: the prior of Sandon, prominent again in a supervisory capacity, at a time when Sandon Priory was experiencing considerable difficulties;⁴⁵² the reeve, Hugh de Wynterore, now probably in his early fifties and embarking upon his last period in office; and the scribe who drew up the Winchester Pipe Roll and skilfully embellished it with cartoons, but who occasionally struggled to find some Latin words, not least that for ‘gathous’.

29. 29 September 1335 to 29 September 1336

The account for 1335/6 is a mine of incidental yet illuminating information. For example, it provides many valuable details about the nature of the buildings and landscape at the manorial centre. In particular, the interior furnishing of the service area of the manor – comprising the kitchen, buttery, pantry, and bakehouse – was renewed, while shelves were made for the lord's chamber and fixed using ropes made from hemp. Outside, references to 'the hedged enclosure' around the chapel confirm that this was a freestanding structure; it was not necessarily surrounded by a green sward, however, for this year saw the enclosure being ploughed up for cultivation.⁴⁷⁴ Elsewhere, a postern gate was made next to the lord's chamber leading towards the riverbank and steps were made down to the river itself. The account also provides unusual insights into the lives of the bishop, his tenants, and other locals. The men of the lord king (and presumably the king himself) were present at Esher for 'discussion', plausibly with regard to Bishop de Orleton's role as an ambassador to the French court during the summer of 1336. Perhaps of most enduring historical significance, though, is the list of grain received from the rectories of Esher and Cobham, for – as with tithe receipts in 1247/8 (doc. 4) – this provides a snapshot of the crops grown and harvested by local peasants, from whom the rectory collected tithes.⁴⁷⁵ What is immediately striking, as discussed in the introduction, is the extent to which peasants at both Esher and Cobham now appear to have relied almost exclusively on oats for nutrition and perhaps for sale. The accounts also suggest that these peasants were not alone in facing challenging times. Indeed, Sandon Priory seems to have lain empty this year, the prior of Sandon instead being prominent in the management of the bishop's manor in a hands-on capacity; as the collection of tithes suggests, there were also vacancies in the benefices of Cobham and – as the account for the following years specifies – Esher.⁴⁷⁶

⁴⁷³ That is, during the episcopal vacancy, when the manor reverted to the king.

⁴⁷⁴ Our picture of the chapel is further enhanced by a passing reference in this account to the chamber that lay beneath it.

⁴⁷⁵ For recent, pioneering work on peasant agriculture using tithe returns, see Dodds, 'Demesne and tithe'; and Sapoznik, 'Resource allocation'.

⁴⁷⁶ The collection and recording of tithes by the manorial administration suggests that the bishop was short-circuiting the process of sending in his sequestrator to receive the fruits of the benefice.
